# CIA-Oswald connection rumored

## *Committee reported checking on double-agent hearsay testimony*

WASHINGTON (AP) — The House Assassinations Committee is reported checking a former CIA employee's hearsay testimony that Lee Harvey Oswald, President John F. Kennedy's accused murderer, was involved in a CIA project in Japan.

The 1-time CIA worker, James B. Wilcott, said in a telephone interview Tuesday that although the information was hearsay, he is convinced it is true. Wilcott also said he personally concluded the CIA planted Oswald in Russia to be a double agent.

The committee refused to comment on whether it was looking into the matter. But sources confirmed the panel is checking the allegation just as it does most tips that it gets concerning the Nov. 22, 1963 assassination of Kennedy in Dallas.

One source said, however, the CIA project Wilcott learned about could have been the CIA's U2 spy flights out of Atsugi Air Base in Japan. The source said Oswald had some connection with the CIA operation as a Marine Corps radar operator.

**WILCOTT SAID** in the interview he told the committee he was a CIA finance officer in Tokyo when Kennedy was assassinated, and that he began hearing the next day Oswald had been with the CIA there.

Several weeks later, he said, a CIA case officer told him one of the CIA projects to which Wilcott had disbursed money was a project involving Oswald.

Wilcott said he had no idea what the project was because finance officers knew little about the projects they disbursed money to, knowing them only under the code names, which they called "cryptos."

Wilcott said he put into writing his recollection of the converstation involving Oswald and gave a copy to the committee.

"I was talking with someone, I can't recall who for sure, and I expressed disbelief about Oswald even being a CIA project," Wilcott said in the written recollection.

**"I WAS TOLD** something like, 'Well, Jim, so and so drew an advance sometime in the past from you for Oswald,' or 'for that project under such and such a crypto.'"

Wilcott said he had other conversations with CIA operations people, and that although he cannot recall their details, he does remember the conclusion he drew from them: The CIA put Oswald in Russia as a double agent.

He said he also was told the CIA trained Oswald to speak Russian and that Oswald was briefly returned to one of the CIA stations in Japan after he left Russia.

Wilcott said although he is convinced Oswald was a CIA double agent, he has no way of knowing whether that means the CIA was involved in Kennedy's assassination.

He said he gave the House committee the names of six or seven people he believes would know for certain Oswald's alleged CIA connections in Japan, if there were any other connections in the rumored U2 radar job.
